Work Experience

Software Engineer II – General Motors (Autonomous Vehicles)

Detroit, MI • 2022 - Present

- Built a web application using React and Flask to host in-house image quality control software
- Increased runtime efficiency of patent-pending algorithm for image quality control by 55%
- Founded and lead a software scrum team serving as its scrum master
- Managed and supervised two engineers in the rotational program

Dev Ops Engineer – General Motors (Vehicle Motion and Embedded Controls)

Detroit, MI • 2019 - 2022

- Co-authored a continuous integration & continuous development pipeline responsible for regularly building 65 software components and appropriately storing and reporting artifacts
- Helped install and support a Git ecosystem for the entire division of 260 employees
- Created a job that detects build errors and reports them directly to the offending author
- Utilized git logs to automate the generation of release letter content for controllers, serving as official business records for all future development
- Devised an algorithm for the automated archival of ILM compliant material

Software Engineer Intern – Michelin

Greenville, SC • 2018 - 2018

- Authored a repository migration application to automatically transfer data from Subversion to Git using the Grails framework
- Developed a blockchain to track resource allocation and value analysis in End User Experience using Multichain, MongoDB, Express.js, Angular 6, and Node.js

Education

B.S. in Computer Science – The Pennsylvania State University

University Park, PA • 2015 - 2019

Technical Skills

Languages - Python, Java, Groovy, C++, C, Javascript, Bash, MySQL, HTML, CSS, Lua, Perl

Tools & Frameworks - Flask, Spring, React, Node.js, Bootstrap, Git, Github, Gerrit, Jira, Jenkins, Docker, Artifactory, Kubernetes, Jupyter, Rational Team Concert

Certifications - SAFe 5.1, Design for Six Sigma (DFSS)

Projects

illustrate_me Python

- A program that adds AI generated illustrations to books by using topic modeling to determine the central theme of each page

Google Trends Web App Javascript, Express.js, Angular, HTML, CSS, Bootstrap

- An online game developed with the MEAN stack and Google Trends API to guess search term popularity
